Vibration Absorbing Silicone Gasket for Computer Power Supply

StarTech ID: PSUSEAL

This power supply (rubber) seal creates a flexible silicone seal between your power supply and the inside surface of the case, dampening vibration and the noise it creates.

The rubber seal is designed to work with most standard case and power supply designs, and does not impede airflow or access to the rest of the case interior.

Applications and Solutions

- Dampen vibrations between the power supply and computer case to reduce overall vibrations in the system
- Absorb vibrations caused by the power supply from an improper seal with the computer case to reduce annoying noises

Features

- Standard ATX form factor power supply cutout
- Rubber construction

Technical Specifications

- Warranty: 2 Years
- Carton Quantity: 131
- Shipping (Package) Weight: 0.07 lb [0.03 kg]
